Report No:

S/57/20

SCRUTINY SCORECARD 2019/20 Q4

Presented by the Corporate Director

SUMMARY

This report provides Members with a detailed breakdown of the Authority's performance against its Key Performance Indicators, Corporate Performance Indicators and site/venue performance for the final quarter of 2019/20. The report covers actual performance from 1 April 2019 to 31 March 2020. This incorporates financial, customer, internal process and sustainability measures that have been agreed with Members. This performance report incorporates all venues and parklands operated in-house by the Authority.

A summary of the Authority's key achievements up to the final quarter of 2019/20:

- KPI's hit the majority of targets and were as expected;
- 7.37 million visits to the Park and Trust Venues at the end of the year, with 4.9 million visits to the Park alone. The year-end target was 7.3 million and visits exceeded the target by 0.37 million;
- the approved levy of £9.6m (37.6% of the maximum chargeable) has been achieved:
- the average combined customer satisfaction score was slightly below target at 84%, with the Authority score alone at 83%;
- the Quest Accreditations target has been met, with all Trust facilities maintaining their current status:
- the Authority has maintained its 'Outstanding' Quest standard for Active Communities.

Factors impacting performance:

- usage overall has shown an increase though some individual sites are now showing a decrease. This is due to the new usage counters providing more accurate data after replacing the old failed counters. This new baselining was anticipated when Members approved the installation of new usage counters;
- regionality scores have dropped in certain areas, with no specific reasons evidenced by the data collector; and
- Net promotor scores have also dropped with most of the accompanying comments regarding items outside of the Authority's immediate control.

RECOMMENDATION

Members Note:

(1) the report.

BACKGROUND

- At the Scrutiny Committee on 15 October 2009 (Paper S/02/09) it was agreed that a performance scorecard should be developed for the Authority and that this should act as a starting point for discussion that may initiate scrutiny reviews to investigate areas of concern or future development.
- At the Scrutiny Committee on 27 January 2010 a scorecard for the whole Authority was presented and discussed. This resulted in a revised scorecard, incorporating Members' comments and was agreed at the Scrutiny Committee on 7 April 2010. It was agreed that officers would provide an update of the scorecard each quarter to Scrutiny Committee.
- The balanced scorecard for the Authority is shown in detail at Appendix A to this report and contains data up to 31 March 2020. The following paragraphs summarise the key messages from the data with further explanation.

KEY PERFORMANCE INDICATORS (KPI)

4 KPI 1: Levy Contribution

The levy for 2019/20 remained as that agreed for 2018/19 with a 0% change and is now 37.6% of the maximum chargeable. A new levy was approved at January Authority maintaining the levy at £9.6m for 2020/21 in line with the draft Business Plan objectives for 2020-2025.

5 KPI 2: 2016-19 Business Plan Objectives

Members agreed a 2016-19 Business Plan and a Work Plan which commenced in April 2016 and of 20 objectives due for completion in 2019/20, 19 achieved target with 1 having slipped (5%). The revised Business Plan Objective spreadsheet is attached as Appendix C to this report. A new Business Plan Objectives spreadsheet will need to be produced to tie in with the new Business Plan.

6 KPI 3: Customer Satisfaction

The average Trust and Authority combined customer satisfaction score for the final quarter of 2019/20 is 84% which is just below target. The Authority alone showing an average customer satisfaction score of 83%.

This score was generated from a sample of surveys carried out between April 2019 and March 2020 with visitors to the Park, either through face to face interviews via our research agency or through self-completion surveys. The score achieved is above the overall UK customer satisfaction index (UKCSI) of 76% and the individual scores for the UK leisure (78%) and tourism (79%) sectors. A new contract procurement for Visitor Tracking was completed, but has been deferred indefinitely due to the Covid-19 pandemic.

7 KPI 4: Stakeholder Perception

The overall perception score is generated by asking a range of stakeholders a set of standard questions. This is to assess their overall perception of the Authority. The survey has been carried out at the annual London Councils Summit. 60 Councillors from 27 of the London Boroughs present at the Summit in Q3 for 2018/19 took part. Based on results the score of 74% was below the target of 75% but was an increase of 1% from the previous year's score of 73%. This, combined with feedback from sports development stakeholders has given an overall score of 74%, which is a slight decrease on the previous year. The next survey was to have been held in Q3 of the 2019/20 year, but the event was cancelled due to the General Election. The next London Councils Summit is expected to take place in November.

8 KPI 5: CO2 Reductions from Authority Operations

Carbon emissions for the final quarter show a minimal decrease on the same period last year – 5,496 tonnes, a decrease of 179 tonnes (3.15%). The unseasonal weather in the first half of the year resulted in additional power utilisation at Trust Venues but this has reduced over the final quarter of the year, partly attributable to the Trust's reduced usage but also due to facility closures/transport reductions due to the Covid-19 pandemic.

9 KPI 6: Usage

4.9 million visits were made to the Authority sites, facilities and services up to the end of the final quarter of 2019/20. This is 462,271 (10.38%) more visits than by the same period last year which can be attributable partly to the increased accuracy of the new usage counters. Additionally, a major spike in usage to open spaces was noted immediately following the lockdown imposed by HM Government, averaging 300% over the weekend periods.

The weather in the final quarter has been worse in some areas than last year. Although temperatures have been 7% warmer, there has been 61% more rain and 3% less sunshine. This has had a negative impact on visitor numbers within Trust venues, but has not adversely affected visits to some Authority sites. The hot sunny period at the end of March encouraged higher visitor levels for this period (see weather table below).

	2019/20	2018/19		
	Q4	Q4	Change	%
Mean Temp	6.8	6.4	0.47	7%
Ave Rainfall	83.6	52.0	31.67	61%
Ave Sunshine	102.0	104.7	-2.73	-3%

AUTHORITY PARKLANDS SCORECARD

10. Overall

Performance across Authority sites is achieving or exceeding target for income, customer satisfaction, net promoter score and compliments. The following paragraphs explain the main outlying scores.

Members are reminded that, from 1st April 2020, the Scorecard will report Authority Indicators only and that this will look different to the current Scorecard

with changes to indicators agreed in Paper E/550/18.

11 Income & Budget Variance

Car Parking Charges – (£131,500) Reduced Income/Increased Costs & Parkland savings (£196,000)

Based on current usage, income from parking charges is forecast to achieve £115,100 against a budget of £204,500 – an estimated shortfall of £89,400.

In addition to reduced income, management fees, cash collection fees and additional cost relating to repeated vandalism of the parking machines have resulted in additional costs of £42,100. In response, officers working with our respective operators (Broxbourne Borough Council and Parking Eye) have taken the decision to remove the cash payment option when replacing vandalised machines, the first of these was installed in February 2020.

Officers are also looking at providing mains power to four car parks - this work has come to the conclusion that three of the car parks are a possibility and therefore these are being pursued. The cost of these works is circa £30,000 but this investment would achieve ongoing savings of £28,000 per annum. For the fourth, Hooks Marsh, we have an indicative price of £200,000 to get power to the location, therefore other alternative options are being considered with ParkingEye. It is anticipated that this investment and approach will improve income and reduce costs, improving performance. This project is on hold due to Covid-19 as UK Power will not attend site, so these savings cannot be achieved until the end of the current lockdown. Updates will be provided throughout 2020/21.

Vacancies across the whole Parklands team provided in-year savings of £67,000. These positions were not filled to help reduce the forecasted overspend caused by the reduced parking income; they have now been filled for 2020/21.

A one-off revenue saving of £30,000 on the maintenance/licence cost of the new usage counters which were installed and funded by the IT capital budget.

Various day-to-day work projects were also not completed, initially delayed by the weather and then further delayed by Covid-19 - this included tree works and meadow management. These will now need to be completed later in this year due to nesting and habitat disturbance during the Spring.

The Parklands budgets are projected to show a net year-end underspend of £64,000.

East India Dock Basin and Gunpowder Park Rentals – (£40,000 reduced income)

Two specific sites were identified to achieve commercial rental income and are included within the budget:

East India Dock Basin (£20,000 reduced Income)

Planning permission was granted in November 2017 for the location of builders cabins required to support Ballymore's construction of their Leamouth south

development. Ballymore wanted the Authority to grant them an Option on the land to place a site compound should they wish, but also claimed they had alternatives that they were pursuing and would not increase the rent they originally offered of £27,500pa. As the Option they requested was to be for no consideration and at a rent that had already been rejected by Members, officers have not pursued this matter further. Officers are now working with a range of partners to deliver alternative options for this site.

Gunpowder Park (£20,000 reduced income)

Member approval to lease to a cycle operator was granted in 2017 and subsequently planning permission was granted in September 2017 to proceed. However, the operator pulled out in December 2017 deciding to focus on online and international sales.

The property has now been leased to a fitness operator who took occupation in November 2019 on a 3 year lease at an annual rent of £21,750. The tenant is now in occupation and following a rent free period will be paying the required rental after the lockdown is lifted and the tenant has re-established their business. This will positively impact the budget in the new financial year.

Section 106 Agreements (£138,600 income)

North London Reinforcement Project £85,000

The Authority recently received £85,000 as a S106 agreement with National Grid for the North London Reinforcement Project, which commenced this year. There is a suite of approved works outlined for delivery through this scheme over a five year period.

There are also a couple of additional S106 agreements that are due to be paid to the Authority this year in relation to the Cheshunt Lakeside development (the phasing of these payments is yet to be agreed), Britannia Meadows, Essex Wharf, and River Lynch restoration project (estimated at £100,000).

Section 106 Oxbow Island - £53,600

The Authority has received £53,600 with Waltham Forest Council for the restoration and habitat enhancement of Oxbow Island. The Authority is working in partnership with the Canal & River Trust, Thames 21 and Mace. The majority of the funds will be spent in the first year on landscaping and habitat works, with a rolling 4 year program to fund further improvements and support local volunteer groups with the ongoing management of the site.

All Section 106 monies are committed to be spent against the prescribed schemes and are included in future years' budget setting.

12 Usage

Usage has increased by 462,271 (10.38%) across parklands and sites compared to the previous year.

 Fisheries usage has decreased due to continuing anti-social behaviour at certain lakes/open water within the Park, with a growth in 'Wild Swimmers' especially during the last summer;

- open spaces usage varies throughout the Park. After the installation of the new usage counters, previous figures which used estimation in some areas has resulted in substantial differentials on some sites, with these sites showing either greatly increased usage or decreased usage. The weather has also played some effect on visitor numbers; and
- a large upsurge in visits was noted during the last two weeks of March due to the Covid-19 pandemic situation.

13 Customer Satisfaction

Overall satisfaction across parklands is 83%, which is lower than last year's score of 86% and is below target. The Trust is showing a customer satisfaction level of 84%. Education scored higher than 90% (96%).

14 Net Promoter Score

The Net Promoter Score is lower than the same period last year at 45%. Several scores are significantly lower than last year, with no specific reason identified by the researchers. Detractor comments are mainly concerned with subjects such as: nothing to do for children; not much to do (adventure equipment); and complaints about areas surrounding the Park (poor appearance of boats/towpath maintenance).

15 Utility Consumption

Utility consumption shows a slight decrease of 41kwh (11.23%) compared to last year. Myddelton House showed a decrease in consumption and Holyfield Farm showed a minimal increase in consumption with the weather playing a major part in this.

16 Cleanliness

The average cleanliness score of 85% has improved on the same period to last year, and is just below target. Areas are showing increased amounts of litter revealed by leaf fall in autumn and there has been an increase in fly tipping at sites, which is investigated where evidence of the perpetrators is available. All areas of unacceptable cleanliness are reported to the grounds maintenance contractor and are monitored using ParkTracker to ensure any concerns are acted upon.

17 Formal Complaints

The number of formal complaints received up to the end of the final quarter has increased from 112 last year to 149 this year. The majority of complaints continue to be focussed on the removal of the free 1 hour option at car parks.

18 Formal Compliments

The number of formal compliments received in the third quarter has decreased from 274 last year to 172 this year. The notable decrease has been within River Lee Country Park, where many Pay and Display car parks are located.

CORPORATE SCORECARD

19 The Authority's Corporate Scorecard performance shows that 14 measures

- have achieved or exceeded target. Explanation is given below for the measure where the target has not been met.
- 20 The number of website hits has dropped by 63,311 (2.76%). There were fewer social media and email campaigns run last year, particularly for Trust-run venues, which would have driven visitors to the web, Analysis has shown that major events usually produce an uplift in web visits and 2019/20 lacked a large scale sports event such as the 2018 Vitality Women's Hockey World Cup.
- 21 The number of positive articles published in the media has dropped by 858 (28.9%). This drop was caused by similar factors to those detailed for the web hits above. Major events normally result in extensive media mentions of venues. In parallel with Paragraph 20, it was also due to a decrease in proactive PR work for Trust-run venues, plus gaps in maternity cover in the Authority's PR operation decreased the amount of media coverage the Authority achieved.
- 22 The response time for complaints has decreased from 7.5 to 5 days for the equivalent period. Though there has been a continued increase in FOI requests with the range of projects in progress by the Authority, many of the responses required are similar in content.
- One site failed to achieve Green Flag Accreditation. Whilst being awarded Green Flag, Rye House Gatehouse was not awarded Green Heritage. Rye House Gatehouse has not been submitted for Green Heritage as the new criteria for judging make it unlikely that the Authority will change the management of this valuable site.
- 24 Staff turnover is lower than last year and within the acceptable range. This equates to 1 end of fixed term contract and 3 resignations.
- The number of disabled visitors has dropped with no specific reason evident, though this could be attributable to the poor weather in the third quarter.

FINANCIAL IMPLICATIONS

There are no financial implications arising directly out of the recommendations in this report.

HUMAN RESOURCE IMPLICATIONS

27 There are no human resource implications arising directly from the recommendations in this report.

LEGAL IMPLICATIONS

28 There are no legal implications arising directly from the recommendations in this report.

RISK MANAGEMENT IMPLICATIONS

29 There are no risk management implications arising directly from the recommendations in this report.

EQUALITY IMPLICATIONS

30 There are no equality implications arising directly from the recommendations in this report.

21 MAY 2020 AT 11:00

E/676/20

Q4 REVENUE BUDGET MONITORING 2019/20 PROVISIONAL OUTTURN

Presented by the Director of Finance & Resources

EXECUTIVE SUMMARY

This report summarises service spending for 2019/20 compared to the budget. Figures are 'near final' and are only likely to be the subject of small changes during the remainder of the closure of accounts process.

Overall net service spending for the year is projected at £181,000 (1.8%) below the net budget for 2019/20.

The majority of reasons for variance were mostly anticipated and reported to Members during the year as part of the quarterly monitoring reports to Executive Committee. Final figures will be incorporated into the audited accounts which are to be reported to the Audit Committee on 25 June 2020.

Service Description	Final Projected Variance 2019/20	Reported Q3 E/657/20 2019/20

Total Estimated Under Spend:	(181,000)	121,500

RECOMMENDATION

Members note

(1) the report.

BACKGROUND

- The Executive Committee recommended a budget for 2019/20 at its meeting in January 2019 (Paper E/604/19). This was approved by Members at the Authority meeting on 17 January 2019 (Paper A/4264/19). This report compares income and expenditure to 31 December 2019 with the approved budget.
- 2 The summary financial position of each Authority service or facility is shown in Appendix A to this report.
- Currently the year-end position shows a projected net over spend of £181,000 (1.8%) against a net expenditure budget of £9.6m. Since the first three quarters' projections (£313,000, £266,000 and £121,500 over-spend) officers have continued to identify one-off in-year savings to reduce the overall impact, also ensuring not to adversely affect the Authority in delivering its business priorities throughout the year. These savings are described within the report.
- 4 Where significant over/under spends are projected at the year-end for particular facilities/services a brief explanation is provided below.

GENERAL ECONOMIC FACTORS

- Certain financial and economic factors continue to impact on the budget during 2019/20 and will continue to do so into 2020/21 and future financial years and these are summarised in the following paragraphs. Overall uncertainty exists in financial markets due to the impact of Covid-19 on the overall economy and as negotiations to leave the European Union continue and officers will monitor closely developments that may have a direct impact on the Authority's budget, for example inflation and interest rates.
- Members received a paper in June 2016 (Paper E/452/16) which set out the agreement between employers/unions in respect of the pay award for National Joint Council (NJC) for local government services. The new pay scales and allowances, applicable from 1 April 2018 and 1 April 2019, including a 2% a year pay award each year, was implemented and included within the budget.

Members approved in May 2018 (Paper E/561/18) that Senior Officers on a pay grade above scale point 49 would also receive the 2% pay increase in line with the NJC award for officers up to scale point 49.

2020/21 negotiations are ongoing with the employers offer of 2% immediately rejected by the Unions. The employers have since made a final offer with a headline figure of 2.75% from 1 April 2020. The offer includes an additional one day's leave which would increase the minimum entitlement from 21 to 22 days per year (plus public holidays) with an additional three days leave after five years of service (currently 4 days). However, the Authority already provide a minimum of 26 days annual leave for those on NJC terms and conditions, so there would be no impact. This position will be updated in future monitoring reports.

7 Continued uncertainty in the banking sector has had an impact on investment returns and certainty around where investments are deposited. The Authority has significantly adjusted its base level of investment income downwards and

this formed part of the budget setting process for 2019/20. The 2019/20 target rate of return agreed by Members as part of the Annual Report on Treasury Management was 1.0% (Paper E/625/19). In 2020/21 the impact of Covid-19 has resulted in the Authority converting its investments into overnight cash to enable it to manage operations through the current crisis. This will mean a significant reduction (estimated £30,000) in returns in the year ahead.

The Director of Finance & Resources continues to monitor the Authority's cash/investments and the institutions that they are invested in and will keep Members updated on any variances in this position through quarterly monitoring reports in 2019/20.

The Authority received the outcome of the 2010/17 rating appeal for Lee Valley VeloPark. A tribunal appeal hearing was heard at the end of March 2019. A more favourable valuation was achieved and this yielded a one-off benefit for the Authority of £180,000 in 2018/19. The reduction in Rateable Value from £2.04m to £1.87m is still subject to another final appeal and further savings may accrue for the 2010/17 rating period and subsequently the new rating period of 2017/2021.

All eligible centres that transferred to Lee Valley Leisure Trust Ltd (the Trust) received 80% mandatory relief for 2019/20. This amounted to a saving of £1.7million and this was again built into the 2019/20 budget and reflected through the Trust's management fee. In 2020/21 the impact of Covid-19 has resulted in the Authority receiving a business rate holiday (100%) for the majority of its venues saving an estimated £2.4m for the year.

- There is still a possibility that a VAT reduction could be applied to local authority sporting income. Our VAT consultants have been using a lead case in respect of non-business treatment and considered the impact of reclaiming VAT on the protective VAT claims previously lodged with HMRC. They believe there is merit in seeking a repayment of the VAT on the basis that this is non-business income (this is a reclaim of VAT for the Authority business pre 2015 with no implications or impact on the Trust activity/VAT). The value of the potential VAT repayment could result in a significant windfall in 2020/21. Officers have submitted calculations to KPMG for review and they have submitted a claim and appeal to HMRC. It is anticipated that this matter will be concluded in 2020/21, although no firm date has yet been established for the lead case to be heard.
- 10 March's inflation for the Retail Price Index stood at 2.6% and Consumer Price Index at 1.5%. With future inflation projected to fall as the impact of Covid-19 is felt.
- 11 The main variances against this year's budget are described below.

CHIEF EXECUTIVE

12 Sponsorship Income (£25,000 reduced income)

As reported previously, naming rights and sponsorship are areas reserved for the Authority under the new Leisure Services Contract (LSC). The Authority is exploring opportunities for joint working with London Legacy Development Corporation (LLDC) in this area and is awaiting results from a Queen Elizabeth Olympic Park (QEOP) wide valuation project which officers will share, plus other ways of joint working. Although work in this area will continue (whilst taking into account changes in the business environment caused by the Coronavirus epidemic) Members (have previously discussed) agreed to remove this stretch

income target from the base budget. This was adjusted as part of the 2020/21 budget setting, therefore removing the ongoing impact of not meeting this target.

13 PR Communications (£37,000 under spend)

The underspend in Communications was due to the cancellation of planned spring promotion campaigns due to reprioritisation with the return to the Authority of the LSC and non-LSC venues; lower than expected costs of some computer systems and licences; and the cancellation of events which the Authority has used to promote its activities.

CORPORATE SERVICES

14 Legal Services (£168,000 over spend)

The Authority is currently engaging external legal services in a number of matters where specialist expertise is required. This is ongoing in the case of Abercrombie Lodge. Whilst the development at Eton Manor has not progressed sufficiently to require the anticipated external legal assistance, other matters have continued to require external legal resources. Other costs relating to the end of the current LSC and the procurement challenge and subsequent litigation on the outstanding Management Fee to the Trust are estimated at an additional £168,000 to 31 March 2020.

15 Property Management (£38,000 net increase against budget)

There was a delay to the opening of College of World Sport at Lee Valley VeloPark due to the timeframe needed to complete the lease, obtain planning permission and the completion of works. Planning permission was granted, the conversion works completed and the lease will now commence on 1 August 2020. The rental income projection of £105,000 will now commence in 2020/21 as the first cohort of students are recruited to start in September 2020.

The Authority was due to receive a one-off £100,000 of income by 31 March 2020 due to the re-gearing of the Odeon cinema lease at Picketts Lock. The premium will be received upon completion of the lease.

Increased contributions to site and contractor investigation works were approved by Members (Paper E/627/19), some of these projected costs were anticipated to fall in next financial year but have become due in the 2019/20 financial year. There will be a corresponding saving in the 2020/21budget.

Two residential properties handed back by the Trust in the last quarter of 2019/20 are also being prepared to be let out to the open market after Covid-19 restrictions are lifted.

16 Planning and Strategic Partnerships & Asset Protection Management & Development (APMD) (£136,000 net saving)

Due to a recent vacancy and the managed under spend of APMD consultants it is projected that there will be a net saving in the budget whilst recruitment options and the new operational structure review is embedded, some of the savings will be used to provide temporary cover where required.

FINANCE & SUPPORT SERVICES

17 Insurance Retender (Saving £110,000)

September saw the completion of a full OJEU retender of our insurance contracts covering Public Liability, Buildings and Vehicle policies for a three year contract with options to extend for a further two years. The competitive nature of the retender; the recognition of a significantly decreased risk profile due to the out-sourced LSC; and the Authority's low claim experience have produced a significantly lower premium — especially in the area of Public Liability. The decision to bring the main venues back in-house will have a material impact on this saving going forward as insurances are required for public, employees and business interruption for the returned venues. These increased sums are built into the emergency budget for 2020/21.

18 Insurance Fund Excess & Storm Fund Contribution (£35,000)

The Authority currently has an insurance fund (£0.7m) to deal with excesses on our policies described above. Each year £25,000 is contributed to meet potential excesses and £10,000 to deal with low level storm damage and smaller uninsured items. Clearly from the lower risk profile highlighted above and the fact that drawn-down monies from the insurance fund barely exceed £20,000 a year, officers believe that not making the contribution this year will expose the Authority to no additional risk. It was therefore decided and prudent to use these monies to offset the in–year overspend projection in Quarters 1-3 and resume contributions in future years. The need for budget savings in 2020/21 has meant this will again be used to offset increased costs in the year ahead and has been deleted from the emergency budget.

19 Internal Audit and General Consultancy Savings (£17,000 net saving)

The internal audit contract is a draw-down contract under the Croydon Framework agreement and the Authority pays for Audit days used. Historically we have utilised 135 to 145 of the budgeted planned days of 155 days. As in all years key core financial audits will be undertaken and spot check audits under the LSC have already been completed. A further 32 days have been included for procurement, the management of change and contract management. It is likely that the plan can be adjusted downwards in these audit areas to be included as part of next year's audit plan to produce a £10,000 saving in-year. These audits e.g. management of change, will be more relevant next year to coincide with the new business plan 2020-25 and the letting of the new LSC. The auditors have already been assisting this year with the procurement of the new LSC.

20 Increase in IT licences and support costs (£40,000)

Additional IT licence and support costs will need to be incurred to meet the cost of access and maintenance of systems as the main venues contract comes back to the Authority. This is to allow staff to access finance, intranet, booking and payroll systems to support the day to day operation of the business. Where it is possible we will try to negotiate quarterly rolling contracts, but suppliers are often reluctant to negotiate short-term arrangements. Some of these costs may be chargeable next year and working with the new LSC contractor may be novated onwards when the new contract is implemented.

SPORT & LEISURE

21 General Savings & Income (£70,000)

The Sport & Leisure Team responded to the request to save budget where possible and/or increase income to help achieve a total team saving across the board. The team achieved this through a range of initiatives, consolidation of work streams and vacant posts. Initiatives such as a wider and more diverse Youth & Schools programme worked well along with obtaining external funding to run more programmes. The Sport Development Team have had a vacant post whilst the Authority investigates its longer term Active Communities structure and efficiencies have been found within general budget items such as staff travel.

PARKLANDS & OPEN SPACES

22 Car Parking Charges – (£131,500) Reduced Income/Increased Costs & Parkland savings (£196,000)

Based on current usage, income from parking charges is forecast to achieve £115,100 against a budget of £204,500 – an estimated shortfall of £89,400.

In addition to reduced income, management fees, cash collection fees and additional cost relating to repeated vandalism of the parking machines have resulted in additional costs of £42,100. In response, officers working with our respective operators (Broxbourne Borough Council and Parking Eye) have taken the decision to remove the cash payment option when replacing vandalised machines, the first of these was installed in February 2020.

Officers are also looking at providing mains power to four car parks - this work has come to the conclusion that three of the car parks are a possibility and therefore these are being pursued. The cost of these works is circa £30,000 but this investment would achieve ongoing savings of £28,000 per annum. For the fourth, Hooks Marsh, we have an indicative price of £200,000 to get power to the location, therefore other alternative options are being considered with ParkingEye. It is anticipated that this investment and approach will improve income and reduce costs, improving performance. This project is on hold due to Covid-19 as UK Power will not attend site, so these savings cannot be achieved until the end of the current lockdown. Updates will be provided throughout 2020/21

Vacancies across the whole Parklands team provided in-year savings of £67,000. These positions were not filled to help reduce the forecasted overspend caused by the reduced parking income; they have now been filled for 2020/21.

A one-off revenue saving of £30,000 on the maintenance/licence cost of the new usage counters which were installed and funded by the IT capital budget.

Various day to day work projects were also not completed, initially delayed by the weather and then further delayed by Covid-19 - this included tree works and meadow management. These will now need to be completed later in this year due to nesting and habitat disturbance during the Spring.

The Parklands budgets are projected to show a net year-end underspend of £64,000.

23 East India Dock Basin and Gunpowder Park Rentals – (£40,000 reduced income)

Two specific sites were identified to achieve commercial rental income and are included within the budget:

East India Dock Basin (£20,000 reduced income)

Planning permission was granted in November 2017 for the location of builders cabins required to support Ballymore's construction of their Leamouth south development. Ballymore wanted the Authority to grant them an Option on the land to place a site compound should they wish, but also claimed they had alternatives that they were pursuing and would not increase the rent they originally offered of £27,500pa. As the Option they requested was to be for no consideration and at a rent that had already been rejected by Members, officers have not pursued this matter further. Officers are now working with a range of partners to deliver alternative options for this site.

Gunpowder Park (£20,000 reduced income)

Member approval to lease to a cycle operator was granted in 2017 and subsequently planning permission was granted in September 2017 to proceed. However, the operator pulled out in December 2017 deciding to focus on online and international sales.

The property has now been leased to a fitness operator who took occupation in November 2019 on a 3 year lease at an annual rent of £21,750. The tenant is now in occupation and following a rent free period will be paying the required rental after the lockdown is lifted and the tenant has re-established their business. This will positively impact the budget in the new financial year.

24 Section 106 Agreements (£138,600 income)

North London Reinforcement Project £85,000

The Authority received £85,000 as a S106 agreement with National Grid for the North London Reinforcement Project, which commenced this year. There is a suite of approved works outlined for delivery through this scheme over a five year period.

There are also a couple of additional S106 agreements that are due to be paid to the Authority in relation to the Cheshunt Lakeside development (the phasing of these payments is yet to be agreed), Britannia Meadows, Essex Wharf, and River Lynch restoration project (estimated at £100,000).

Section 106 Oxbow Island - £53,600

The Authority has received £53,600 with Waltham Forest Council for the restoration and habitat enhancement of Oxbow Island. The Authority is working in partnership with the Canal and River Trust, Thames 21 and Mace. The majority of the funds will be spent in the first year on landscaping and habitat works, with a rolling four year program to fund further improvements and support local volunteer groups with the ongoing management of the site,

All S106 monies are committed to be spent against the prescribed schemes and are included in future years' budget setting.

25 Savings Targets 2019/20 (£61,000 unachleved savings)

As part of the budget setting process and savings targets for 2019/20, ongoing savings from service reviews (£137,000 in 2019/20 growing to £217,000 by 2020/21) are unlikely to be concluded until later this year. These service reviews include the senior management structure, Active Communities, Property, Planning and Legal Services. These areas are being reviewed in the context of the new Business Plan for 2020 to 2025 and will complete a top to bottom organisational review commenced in 2017/18. There is a provision for offsetting potential additional electricity costs incurred at Holyfield Hall Farm (that may not be required) against this target which will leave the above savings target £61,000 below budget. Where new vacancies materialise and further savings are identified in-year these will be utilised to mitigate this savings target.

In the context of a busy and challenging 2020-25 work programme it is important that the Authority has the capacity to deliver a number of key projects. The service reviews and the original savings target will need to take this into account.

26 Leisure Services Contract Potential Clause 14 Adjustments (£138,000)

As part of the 2018/19 Management Fee, Members approved Clause 14 adjustments (Papers E/613/19 and E/635/19) agreed with the Trust. Clause 14 adjustments become payable in the financial year after approval.

As part of 2019/20 LSC the Trust have identified (through their quarterly monitoring reported to Members in September (Paper E/636/19)), potentially £269,000 to £294,000 of further Clause 14 adjustments to the Management Fee. At the last Executive Committee (Paper E/670/20) Members approved £102,000 to be included as part of the end of contract liabilities discussion.

These are due to the potential shortfall in income as the instalment of the lodges at Dobbs Weir were delayed, also, the impact of site investigation works at Picketts Lock reducing the golf and camping facilities income on that site.

ENVIRONMENTAL IMPLICATIONS

27 There are no environmental implications arising directly from the recommendations in this report.

EQUALITY IMPLICATIONS

28 There are no equality implications arising directly from the recommendations in this report.

FINANCIAL IMPLICATIONS

- 29 These are dealt with in the body of the report. The overall outturn will leave general fund balance at £4.3m (subject to any changes as part of the Final Accounts process). The approved level of £4m (minimum) was agreed as part of the 2019/20 budget.
- 30 There are significant matters that are not included in the current year-end position that could (if they materialise) positively or adversely affect the estimated position into 2021.

The potential impact of a further rates reimbursement is covered in paragraph 8, also further S106 monies as described in paragraph 19 could materialise (notwithstanding that these would be matched by future years spending).

Conversely the Authority/Trust are in dispute with a supplier concerning significant water consumption and related bills at the Picketts Lock site. The matter is currently in dispute as the facts around actual usage, a faulty meter, potential leaks and late billing are yet to be resolved before the actual liability can be established. Alongside this are the end of contract liabilities discussions that are ongoing with the Trust. The Authority view is that the Trust carry a significant net liability payable to the Authority mainly relating to the Repairs and Renewals fund and receipts in advance, whilst the Authority is continuing to retain monies due to the Trust as part surety against this potential debt (e.g. 2019/20 Clause 14 payments). The Authority has paid £1.49m (net of VAT) Management Fee to the Trust against the originally approved fee of £1.436m (net of VAT).

HUMAN RESOURCE IMPLICATIONS

31 These are dealt with in the body of the report.

LEGAL IMPLICATIONS

There are no legal implications arising directly from the recommendations in this report.

RISK MANAGEMENT IMPLICATIONS

33 Spending of the budget is important in achieving the Authority's corporate objectives. The current net spend at the end of this financial year will impact on the Authority's budget in future years and is incorporated into the Medium Term Financial Plan as part of the Emergency Budget Planning into 2020/21.
